EVERREADY FAMILY

# Your Digital Life, Written Down

Every account, subscription, and device — and how your family reaches them.

Your bank has a branch. Your photos, bills, and subscriptions live behind logins. This is the map — kept on paper, in your house, under your control.

Fill it in on screen, or print it and write by hand. Large print throughout — made to be read at a kitchen table, not squinted at.

By Bill Morton, EverReady Family

**SAMPLE EXCERPT — full guide available at the link on the cover sheet**

# Read this first

**This is an organiser, not a legal document and not legal, medical, tax, or financial advice. It does not replace a will, directives, or professional advice.**

This book organises information and records wishes. Filling in these pages does not make a will, a power of attorney, a trust, or a medical directive. Those documents have to meet your state's rules, and states do not all agree. Have a licensed attorney in your state prepare or review your legal documents, and use this book to record where the originals live and what you want — so the people you trust are not left guessing.

Keep this book somewhere your family can actually find. Tell two people where it lives. A finished book nobody can find helps nobody.

Write no raw passwords in any EverReady book. Record where things are, who holds them, and how your trusted person gets help — never the passwords themselves.

# The pointer method — read this first

Your bank has a branch. Your photos, bills, and subscriptions live behind logins. This book is the map — kept on paper, in your house, under your control. For every account you record: **the company, the account or username as a hint, where the password lives (your password manager, a sealed envelope with a named person), and what should happen to it — keep, transfer, or cancel.**

**THE NO-RAW-PASSWORDS RULE — printed here and repeated through this book: never write a password, PIN, seed phrase, or recovery code in this book.** A book full of passwords is a gift to a burglar. A book full of pointers is a gift to your family. If you use a password manager, name it and name its emergency contact. That one line does the work of a hundred passwords, safely.

Note: EverReady's shorter Digital Asset Inventory Workbook (ER-DAI-001) stays available for a quick inventory. This kit is the full, flagship version — categories in depth, subscriptions with a cancel/transfer column, devices, legacy-contact setup checklists, and a digital-executor one-pager.
